

BUILDING / MEETING SPACE

Regal CineMeetings & Events

www.regalcinemedia.com/MeetingsNonProfit.asp

United Artists Theatres, Regal Cinemas, and Edwards Theatres are available nationwide for a variety of uses by non-profit organizations.

Movie theaters, mostly vacant on Sunday mornings, have become practical solutions for some churches in need of a worship facility. Around the country, churches are finding theaters to be viable options for worship space. With access to more than 500 theatres in 36 states, Regal CineMeetings & Events can accelerate the growth of new churches, expand the reach of existing churches, and enhance worship seminars and events. Theatres can be an option for: Church planting, Church growth, and Worship Events.

Living Stones Associates

www.living-stones.com

Because their team grew out of the work of their founder, architect Ray Bowman, they have expertise in helping churches make optimum use of their buildings, minimizing spending on facilities so they can invest more time, money and energy in the mission of the church. Their name, Living Stones, reflects the fact that their work involves facilities but that their real mission has to do not with building church buildings, but with building the church itself.

Portable Church Industries

www.portablechurch.com

Launching a new church can be a daunting task, full of challenges and obstacles to overcome. Where will you meet? What will you need? How much will it cost? And once your ministry begins to grow, you're faced with a whole new set of challenges. How can you make better use of your space? How can your team of volunteers set up and tear down all of your equipment on time?

PCI has helped hundreds of new and growing churches tackle issues like these. Whatever phase of development your church ministry is in, PCI can show you how to make the most of your time, money and resources.

Sprung Instant Structures
